

Mr. Northington is a professional engineer with over nineteen years of experience in the environmental field in the areas of site investigation, remediation system engineering and construction, project management and technical assistance. He received both his undergraduate and graduate degrees in environmental engineering from Michigan Technological University. Mr. Northington currently serves as the Southeast District Manager with Regenesys. In this capacity, he provides technical support for application of soil and groundwater remediation and vapor intrusion mitigation technology solutions. Mr. Northington works directly with environmental consulting, construction, and engineering firms to develop successful remedial approaches by offering design, application, and performance review expertise for in situ-applied remedial strategies across a broad spectrum of technology classes.
