

Geo Lab Drilling is a reputable, customer focused Drilling, Probing, and Remediation Company providing services across the Southeastern United States. We offer our clients a range of services including Environmental and Geotechnical sampling of soil, vapor and groundwater using Direct-Push Technology (DPT) and Hollow-Stem Auger (HSA) systems, and subsurface investigation services including MIP and HPT direct imaging technologies. Additionally, we provide a range of well installation services using DPT, HSA, DTH Air-Hammer drilling, and Rock Coring technologies for the installation of piezometers, monitoring, remediation system, and injection wells. **Remediation Services** include the direct application of ISCO, ISCR and Bioremediation materials into the subsurface through injection wells and networks of direct-push injection points, as well as via soil blending. We offer a diversity of services while providing highly experienced, HAZWOPER certified, safety-minded technicians on every project, without sacrificing quality.
