

The PeroxyChem Environmental Solutions team provides a portfolio of field proven products and technologies that support soil and groundwater remediation for both *in situ* and *ex situ* applications. For more than 20 years PeroxyChem products have been used to successfully treat thousands of sites with impacted groundwater, soils, sediments, and industrial process wastes around the globe. Our portfolio of proven chemical oxidation, chemical reduction, metals treatment and bioremediation technologies promotes the rapid and cost-effective removal of a wide range of organic compounds and heavy metals.
